

TRANSMON ENGINEERING LTD

Over Speed *Savure*™

Over Speed Warning System

- Suitable for Gas, Diesel & Electric Trucks.
- Advised for forklift truck operating areas that are used by pedestrians.
- It is fully adjustable.
- It does work in forwards and reverse.
- It does not affect hydraulic lifting capacity of a vehicle.
- Site safety is increased.
- Reduced insurance premiums can be made.

How Over Speed Savure Works

This system will monitor the travel speed of any IC engine powered forklift truck. The system will not govern the engine but will indicate when a set speed has been exceeded. The system can be set to your customers required speed limit.

When the truck reaches the set speed limit it will automatically activate a beacon on top of the truck, a buzzer and an LED both fitted in the cab.

When the truck speed drops below the set speed limit. The unit will reset and warnings will cease. The system will not affect the performance of the truck it is designed as a warning only.

Technical Specifications

Voltage Range:	12V-24V DC
Minimum Current Standby:	≥ 10mA
Maximum Current Triggered:	≥ 10mA
Nominal Operating Temp:	-10° to + 85°c
Dimensions:	105mm x 72mm x 32mm
IP Rating:	IP68 (Module Only)
