

TRANSMON ENGINEERING LTD
*Zone Speed **Savure**™*

Zone Speed System.

- Can be fitted to any vehicle.
- Defined Zoned Areas.

**3 VARIANTS PENDING APPLICATION
CAN BE CONNECTED TO**

- Tranmon Speed Savure.
- Truck management system. (Tortoise - Hare)
- Stand alone beacon and buzzer warning.

How Zone Speed Savure Works

This system offers safe speeds in pedestrianated areas whilst keeping productivity at a maximum in areas of less danger.

Each gate/exit has a hard wired and fixed proximity transmitter. This is adjustable in radius field to suit the site and trucks.

Each truck has a receiver that is programmable to suit the transmitter and the site.

Once the truck enters the Zoned area the system automatically switches to controlled operation, (Pending on the above variant installed).

Once the truck leaves the Zoned area the unit automatically switches to normal operation. The system defaults to safe.

Technical Specifications

Voltage Range:	6V - 16V DC
Maximum Current:	72 - 80mA
Nominal Operating Temp:	-10° to + 60°c
Dimensions:	84mm x 40mm x 19mm
Humidity:	5% - 90% (Now condusing)
Weight:	45 gamms
Colour:	Grey
Frequency:	433 MHz
