

### **Seat Belt System**

- Suitable for Gas, Diesel & Electric Trucks.
- Advised for forklift truck operating areas that are used by pedestrians.
- Site safety is increased.
- Reduced insurance premiums can be made.

### **How Seat Belt Savure Works**

This system has been designed to alert the operator that the seat belt is not connected or has been disconnected during use.

An audible buzzer and a visual lamp mounted in the cab to alert the operator. Off truck personnel are alerted via an external-flashing red beacon.

The only means of deactivating the warning during usage is to replace the seat belt strap into the seat belt clasp.

The warning devices will all remain active whilst the system detects the seat belt is not fastened when the truck is in use.

### **Technical Parameters**

Voltage Range:	8V-32V DC
Minimum Current Standby:	≥ 10mA
Maximum Current Triggered:	≥ 20mA
Nominal Operating Temp:	-10° to + 85°c
Dimensions:	130mm x 75mm x 33mm
Fixing Centres:	115mm
IP Rating:	IP68 (Module Only)
