SAVURE RANGE

Truck Safety Systems

Introduction to the Savure Range

Transmon's Savure Range assists forklift operators in areas that are critical to the day to day running of many materials handling operations.

These include restricting operator abuse, increasing site safety & security, reducing running costs, monitoring activities of sites/departments/vehicles/operators/contracts and more.

Truck Safety Systems

We have a wide range of truck safety systems to help manage day to day operations and utilisation of equipment.

Speed Savure 1

Designed to prevent the forklift operator exceeding a pre-settable speed limit.

- Speed Savure 1 is for Mechanical throttle
- Fully adjustable, does not affect hydraulic lifting performance
- Suitable for Gas / Diesel torque flow converter forklift trucks
- Doesn't affect hydraulic lifting capacity of truck
- Reduced insurance premiums can be made

Speed Savure 6

Designed to prevent the forklift operator exceeding a pre-settable speed limit.

- Speed Savure 6 is drive by-wire and digitally programmable
- Truck performance is not affected by gradients
- Fully adjustable, does not affect hydraulic lifting performance
- The system features acceleration via an adjustable slew rate

Over Speed Warning System

Designed to alert the operator / pedestrians that the preset speed has been exceeded.

- Suitable for Gas, Diesel & Electric Trucks
- Advised for operating areas that are used by pedestrians
- Works in forward and reverse

Manual Speed Savure

- This modification can be interfaced with the Speed Savure 1 or Speed Savure 6
- Allows high and low truck speed to be achieved
- Selection is made manually and

Power Savure

Designed to shut the forklift down after an adjustable idle period, saving fuel or battery power.

- Easy to install
- Simple set up and low maintenance
- Increased site safety
- Auto power off
- Shuts down engine to save fuel & conserve battery power
- Idle shut down delay select 1,2,4 or 8 minutes

Zone Speed System

Designed to prevent the operator from exceeding a pre-defined speed limit in specified zones.

- Can be fitted to any vehicle
- Defined Zone Areas
- Can be connected to Transmon speed savure (1 or 6) OR inbuilt truck management system (Tortoise - Hare)
- Stand alone beacon and buzzer warning devices can be activated

Seat Belt Savure

Designed to alert the forklift operator that the seat belt is not connected or has been disconnected during use.

- Suitable for Gas, Diesel & Electric Trucks
- Advised for forklift truck operating areas that are used by pedestrians
- Site safety is increased
- Reduced insurance premiums can be made

Transmon products help to make materials handling operations safer, greener & cheaper by fitting electronic devices and fleet management systems.

We are a UK manufacturer and supplier of simple solutions that fit all types of IC and electric forklift trucks.

Transmon is a privately owned independent UK Company based in Leicester, the Midlands. The company works closely with OEMs, distributors, dealers and end users of Materials Handling and plant equipment.
