

Active Reverse

What is Active Reverse?

Transmon's Active Reverse Driver Assistance System is designed to improve safety through the monitoring and ultimately the elimination of the driver's blind spot(s). Trucks and mobile plant are outfitted with heavy duty ultrasonic sensors, drivers receive in cabin acoustic and visual alerts when pedestrians and objects are detected in the warning and danger zones. An automatic speed restriction can be provided when Active Reverse is combined with Transmon's Speed Limiter.

What's included:

- Rear sensors
- In-cab display unit
- Brackets and cabling
- Side sensors (option)
- Transmon Speed Limiter (option)

Features:

- 12, 24, 48, 80Vdc options
- Three configurable zones
- 10cm to 9m operating range
- Designed for arduous applications
- Activation on selection of reverse direction
- Compatible with IC and Battery powered forklifts and mobile plant
- Integration with vehicle's own control system (alternative option for speed reduction)

Benefits to you:

- Especially useful for large forklifts and mobile plant
- Increase site safety, reduced vehicle and stock damage
- Robust system, unaffected by low light or bad weather conditions
