

Warning Lights

Forklift Warning Lights

Transmon's high quality warning light range has been developed to enhance site safety by increasing operator and pedestrian awareness of moving hazards. Our portfolio includes projected blue spot and line warning lights. Blue spot lights can be powered permanently or powered in accordance with the direction of travel. Three separate Line Lights can be positioned to create a halo effect around a forklift truck (L-R hand-side and rear facing).

What's included:

- Blue spot light
- or line light
- Bracket, cabling, protective line fuse

Features:

- Blue spot light voltages: 12, 24, 48Vdc
- Choice of Red or Blue line lights
- Line light voltage range: 12-80Vdc
- Compatible with IC and Battery powered forklifts and vehicles

Benefits to you:

- Improved site safety
- Can be fitted to any vehicle
- Warns operators and pedestrians of hazards
- Blue spot lights provide advanced warnings of approaching MHE
- Line lights define the minimum safe distances around a forklift truck
