

Camera Systems

Camera driver aids increase forklift and pedestrian safety by reducing the likelihood of accidents. They help drivers to carry out their day-to-day tasks more safely by increasing awareness. Pedestrian Warning Cameras provide the same benefits as regular camera systems with the addition of driver alerts when pedestrians are detected in the warning zones.

Pedestrian Warning Camera

Programmable camera system comprising of an Intelligent Pedestrian Warning Camera and a 7" high resolution TFT monitor with audio. On detection of a person(s) the monitor will provide the driver with visual and acoustic alerts. When the hazard has cleared the driver alert is automatically removed.

Features

- 1080P HD resolution
- 12, 24, 48, 80Vdc options
- Supports up to 4 cameras
- Programmable warning zones
- 140° or 52° viewing angles, 0.5-12m range
- Options for Split-screen and Quad monitors
- Suitable for forklift and mobile plant equipment
- 1-2 camera options for Very Narrow Aisle forklift trucks
- Automatic speed reduction with pedestrian alert (option)
- Standalone cameras with acoustic and beacon alerts (option)

Benefits to you:

- Simple to install
- Reduced damaged costs
- Increased forklift and pedestrian safety
