Camera Systems

Camera Systems

Camera driver aids increase forklift safety by reducing the likelihood of accidents. They help drivers to carry out their day-to-day tasks more safely by increasing awareness and driving accuracy. Reverse cameras help drivers to manoeuvre forklifts and plant safely in busy yards and warehouses, fork and carriage mounted cameras help drivers operating equipment in high bay racking environments. Options for waterproof monitors, wired and wireless cameras, DVR video footage recording and Cloud Services.

Reverse Camera

HD camera systems offer excellent visibility gains for operators. The camera is mounted directly on the vehicle and focuses on the area of sight required, equipped with an automatic iris which compensates for the changing lighting conditions. Live footage displayed on a HD 7" colour flat screen monitor located in an unobtrusive position assists operators when manoeuvring vehicles.

Wireless Carriage Mounted Camera

The magnetic carriage mounted camera system is ideal for vehicles needing to handle pallets at height, it offers the operator excellent visibility from a standard driving position. Optional onboard video recording via the 7” HD monitor (SD memory card is required). The camera system enhances health and safety levels by reducing the amount of damage caused by miscalculations made due to human error.

Benefits to you:

- Simple to install
- Increased site safety
- Increased productivity
- Reduced damaged costs
- Options for up to 4-Cameras
- Suitable for forklifts and mobile plant
- Options for onboard Footage Recording, Cloud Services
