Pedestrian Alert Camera System

Camera Systems

Camera driver aids increase forklift and pedestrian safety by reducing the likelihood of accidents. They help drivers to carry out their day-to-day tasks more safely by increasing awareness. Pedestrian Alert Cameras provide the same benefits as regular camera systems with the addition of driver alerts when pedestrians are detected in the warning protection zones.

Pedestrian Alert Cameras

Programmable camera system comprising of an Intelligent Pedestrian Alert Camera and 7” high resolution monitor with audio. On detection of a person(s) the monitor will provide the driver with visual and acoustic alerts. When the hazard has cleared the driver alerts and optional speed or lift restrictions are automatically removed. Options for Dual, Quad, Waterproof Monitors, DVRs and Cloud Services.

Features

- 1080P HD resolution
- 12, 24, 48, 80Vdc options
- Supports up to 4 cameras
- 52° viewing angle, 0.5-20m range
- 140° viewing angle, 0.5-12m range
- Three programmable warning zones
- Options for Split-screen and Quad monitors
- Suitable for forklift and mobile plant equipment
