Site Zone Proximity Warning

What are Proximity Warning Systems?

Warehouses, production plants and loading yards are fast paced working environments where it's common place for forklifts and people to work in close proximity to each other. The 360° Site Zone RFID Proximity Warning System raises the level of safety by alerting Drivers and Pedestrians when they are working in close proximity to each other. Forklifts and mobile plant are outfitted with a vehicle kit; pedestrians wear tamperproof vibration tags.

360° Pedestrian Warning System

Drivers and pedestrians are alerted when warning zones are breached. Pedestrians wear lightweight tamperproof vibrating tags with belt-clip, helmet, armband, or lanyard tag wearable options.

- Acoustic and visual driver alerts
- Configurable 2 to 10 metre zones
- Second antenna for large vehicles
- Designed for arduous site conditions
- Test Station for pedestrian tag health checks

Options:

- Creep speed with zone breaches
- External alert beacons and sounders
- Vehicle Building Zone Alerts and Safe Zones
- Cloud Hosted Safety Dashboards and Reports

Benefits to you:

- Increased site safety by reducing the likelihood of vehicle to pedestrian collisions
- Suitable for Diesel, LPG and Battery powered Material Handling Equipment
- 360° monitoring, automatic alerts for drivers and pedestrians
- Automatic speed reduction with zone breaches (option)
- Pedestrian alerts by vibrating tags
- Visual and acoustic driver alerts
