Power Saver, Idle Timeout System

What is Transmon's Power Saver?

Transmon's Power Saver is an operator presence sensing idle timeout control system which automatically shuts down trucks after a predetermined period of time. To meet different operational requirements the programmable idle timeout feature is adjustable from 10 to 300 seconds. The device helps to reduce fuel consumption and engine run time as well as preventing starter battery over discharge.

What's included:

- Control module
- Installation guide

Features:

- 12-24, 48, 80Vdc options
- Robust design, easy to install
- Programmable timer and presence triggers
- Suitable for Diesel, LPG and Battery powered forklifts and vehicles

KPA2 Access Control Keypad

Benefits to you:

- Reduced fuel bills
- Reduced engine wear
- Reduced non-operational hours
- Reduced servicing requirements
- Starter battery over discharge protection
- Can help to enforce Access Control when paired with a KPA2 Access Control keypad
